

We wouldn't tolerate a private police force.

We wouldn't tolerate a private army.

We wouldn't tolerate private courts.

So why do we tolerate private MONEY that is created out of thin air and lent to us at interest?

When instead we could have all our new money created by ourselves via an independent state institution and spent into circulation by the government, debt free!

Before 1844 banks created their own bank notes for the cost of printing them. Recognising that for the fraud that it was, government put a stop to it.

Now, banks create electronic money for virtually no cost and lend it to us at interest, profiting hugely in the process.

It is time that government recognised that for the fraud that it clearly is and put a stop to it.

To learn how to make that happen, go to
